

**CENTRE FOR DEVELOPMENT OF IMAGING TECHNOLOGY
(TECHNOLOGY EXTENSION DIVISION)**

SYLLABUS

DIPLOMA IN COMPUTERISED FINANCIAL MANAGEMENT(DCFM)	
Scheme: 2023 Scheme Course Code: 23D02 Duration: 6 Months Eligibility: SSLC or Equivalent	
THEORY SUBJECTS	
23D02-101	Paper I- Computers and Office Packages
23D02-102	Paper II - Business Accounting
23D02-103	Paper III - Advanced Business Accounting
23D02-104	Paper IV - E-Commerce and Logistic Management
LAB SUBJECTS	
23D02-105	Lab I-Tally Level - I and Office Packages
23D02-106	Lab II- Tally Level - II and Spreadsheet
ANNEXURE	
Assignments for Theory & Questions for Lab	

SYLLABUS FOR THEORY

23D02-101 - COMPUTERS AND OFFICE PACKAGES

Theory Hours - 50 Hrs

Module I - Computer Fundamentals (10Hrs)

Learning Outcome

- Understanding about computers, software, hardware, virus, etc
- Understanding about digital documentation and data security
- Understanding about IT ACT, features, offences, etc

Topics

Computers-Features of Personal Computers- Components of a computer -Hardware-Software- different types of software - Operating System - Functions and features
Viruses - Types of viruses - Detection and Prevention - Anti-virus software - Cloud Computing - Knowledge Management - Digital documentation -Data Security-Digital Signature Certificate (DSC) - E-Publishing- IT ACT-objectives, features, offences

Module II - Overview of Internet (10Hrs)

Learning Outcome

- Understanding about computer networks
- Understanding about internet and related services
- Awareness about IT and society, cyber ethics, security and privacy issues

Topics

Computer Networks - Types of Networks - Components of Networks - Introduction to Internet URL - HTTP - FTP - World Wide Web - Web Browsers- Search Engines - Search Tools
Intranet - Introduction to Intranet - Benefits - Breaking Down the Barriers - Threat of an Intranet culture
IT and society - Issues and Concern - Digital Divide - IT and Industry - Opportunities and Threats -Cyber Ethics - Security and Privacy Issues - Cyber Addictions

Module III - Word Processor & Presentation (10Hrs)

Learning Outcome

- Understanding of word processing, text formatting, page layout etc
- Knowledge about presentation interface.
- Creating multimedia presentations.
- Using design layouts and templates for presentations.

Topics

Word Processor

Introduction to Word Processing - Word Processor Basics, typing text, selecting, copying and deleting text

Creating and formatting documents - Word Processor Interface, Toolbars, Ribbon and Menus; Creating a new document; Clipboard, Cut, Copy, paste text; Find, Replace and select Text; Insert and delete comment; Use of Undo and Redo operations; Saving a document; Opening an existing document and closing a document

Text Formatting - Familiarise various Fonts, font size, font style; Format text, Bold, Italic, Underline, Strikethrough, Superscript and Subscript; Text effects, text highlighting, applying font color; Change the Text Case; Alignment of text; Formatting a paragraph, Drop Cap, spacing, Tabs and Indents ; Copy formatting with Format Painter; Using Borders and Shading; Create a numbered list or bulleted list

Working with objects - Insert pictures, WordArt, shapes, symbols, Date and Time; Insert Text box, Charts, insert Table and its manipulations

Document Formatting - Insert Header and Footer, Footnote and End note; Page numbering, using Watermark, applying Page Borders-Page Layout Settings - Page setup options - Setting Margins, Page orientation, Paper size

Mail merge and its operations

Printing a document - Previewing, settings - Print All / Current Page / Custom Print; printing a document; Word processor file extension formats

Presentation

Create and Manage Presentations - The Basics; Introduction to Presentations and slides; Familiarizing Presentation Window; Create a New Presentation; Creating a presentation using templates; Open a Presentation; Saving a Presentation- presentation file extension formats

Working with Slides - Inserting a new slide; Selecting a slide layout; Copying slides; Setting slide background; Applying themes to slide layout; Making duplicate slides

Manipulation of Slide contents - Inserting Text Boxes; Formatting text; Creating list with bullets and numbering; Changing Text directions; Inserting Pictures, Shapes, WordArt; Inserting Chart inside a slide; Grouping objects in a slide; Inserting slide header and Footer; Different presentation views

Transitions and Animations - Applying various Slide Transitions; Animate slide contents, Custom Animation; Set timing for Transitions and Animations; Creating Multimedia presentation - add video and audio

Slide Show - Running a slide show; Creating custom slide show

Sharing A Presentation - Convert presentation to PDF ; Convert presentation to Video ; Create an Image from presentation ; Printing and Broadcasting a Presentation.

Module IV - Spreadsheet Basics (10Hrs)

Learning Outcome

- Understanding about spreadsheet basics
- Understanding spreadsheet manipulations
- Understanding how formatting done in spreadsheet

Topics

Introduction to Spreadsheets - Spreadsheet Basics; Familiarise Interface; Components of Workbook; Worksheet, Cell and Cell Address; Create New Workbook; Enter Text and Numbers in Cells; Select Cell, Row and Columns; Save a work book; locate and open an existing workbook; Workbook views; Zooming; Arrange windows; Freeze Pane; Close a workbook

Spreadsheet manipulations - Edit cell contents; Use Undo and Redo; Use Cut, Copy Paste commands ; Paste Special options; Move or Copy Cells Using Drag and Drop; Copy Using Auto Fill; Complete a Series Using AutoFill; Insert a Column or Row; Delete a Column or Row; Insert a Comment; Copying and moving Spreadsheet; Rename, Insert and Delete Spreadsheet

Formatting - Formatting of cell contents – setting Font, Font size, style; Font colour, Bold, Italic, Underline cell contents; Cell Alignments; Text Wrap, Merge & Center; Format Cell values; Copy Formatting with the Format Painter; Applying borders; Apply a Cell Style; Format a Cell Range as a Table; Apply a Document Theme; Setting header and footer in a worksheet; Inserting page number and page breaks in a worksheet; Applying Borders and shading; Fill Series; Data Sorting ; Filter lists using Auto Filter ; Use Find and Replace; Check Spelling; insert links

Calculations in a Spreadsheet - Using Auto Sum; Functions; Create a Formula; Use basic functions

Preview and Print - Page Setup; Setting Print Area and Print Titles; Print Preview and set Print options and Print Worksheets; Print an entire workbook-Spreadsheet file extension formats

Module V – Spreadsheet Advanced (10Hrs)

Learning Outcome

- Understanding about the advanced spreadsheet operations
- Understanding about various types of functions
- Understanding about charts, mail merge using worksheet data, etc

Topics

Data Validation;

Logical functions - IF and Nested IF functions, Using AND / OR/ NOT functions

Statistical functions -Using AVERAGE / COUNT functions, Using SUMIF / COUNTIF functions

Date / Time functions – Using Today, now & date functions

Text functions – MID / LEFT / RIGHT / TRIM / UPPER / LOWER functions

Math Functions – FLOOR / CEILING / MROUND functions

Advanced filters – Extracting records with Advanced Filter;

Conditional Formatting; Remove Duplicates; Pivot Tables;

Working with Charts – Creating and manipulating charts

Mail merging using worksheet data - Importing address list from a work book for mail merging

Sharing & Protecting workbooks - Sharing workbooks, protecting work sheets / workbooks

Linking spreadsheets

23D02-102 – BUSINESS ACCOUNTING

Theory Hours - 50 Hrs

Module I – Introduction to Accounting (14 Hrs)

Learning Outcome

- Understand the basic terms in accounting
- Know different branches of accounting
- Learn the accounting principles and concepts
- Get acquainted with journal, ledger, trial balance and final account preparation
- Generation of financial reports in Tally
- Understand the importance of bank reconciliation statement and preparation.

Topics

Introduction to Accounting – Meaning – Basic Accounting Terms – Books of Accounts – Characteristics of Accounting – Objectives – Functions

Branches of Accounting – Financial Accounting, Cost Accounting and Management Accounting

Accounting Principles – GAAP – Accounting Concepts

Analysis of Business Transactions – Classification of Accounts – Personal, Real and Nominal Account.

Preparation of Journal – Ledger – Trial Balance and Balance Sheet.

Preparation of Financial Reports – Balance Sheet – Profit & Loss A/c – Books & Registers – Sales Register – Purchase Register – Printing of Invoice and Report.

Preparation of Bank Reconciliation statement

Module II – Introduction to Tally (8 Hrs)

Learning Outcome

- Know about accounting software
- Learn the basics of Tally (Latest version)
- Creation of a company and basic accounts in Tally
- Understand the method of migration in Tally (Old versions to New version)

Topics

Introduction to Tally – Features of Tally

Company Creation and Setting up Company Features in Tally – Alter Company Details – Shut the Company, Preparation of Chart of Accounts –Introduction

Creation of Masters – Accounting Masters – Inventory Masters – Alteration of Masters in Tally – Deletion of Masters

Multi-Masters Creation and Display of Chart of Accounts – Migration of Tally (old version) Company Data to Tally (new version).

Module III – Supply Chain & Inventory Management (8 Hrs)

Learning Outcome

- Understand the concept of supply chain
- Know the basics of inventory management through Tally

Topics

Inventory – Introduction – Supply Chain – Types of Suppliers

Inventory Management – Terms Used in Inventory Management – Inventory Masters in Tally – Creation of Inventory Masters in Tally

Module IV – Accounts Management (10Hrs)

Learning Outcome

- Learn the concept of accounts management
- Know the maintenance of bills and report generation
- Study the outstanding bill management and bill settlement in Tally

Topics

Accounts Receivable and Payable Management – Introduction – Accounts Payable and Receivable

Maintenance of Bill-wise Entry – Activation of Bill-wise Entry – Usage of Bill-wise entry in Purchase and Payment Voucher – Usage of Bill-wise entry in Sales and Receipt Voucher Bills Payable and Receivable Reports in Tally

Analysis of Outstanding – Generating Reminder Letter in Tally – Generating Confirmation of Accounts in Tally – Bills Settlement – Bills Payables.

Module V - GST and TDS (10 Hrs)

Learning Outcome

- Know the concept of GST
- Preparation of E-way bills and GST E-invoicing
- Understand the concept of TDS and TDS in Tally

Topics

Goods and Services Tax - Introduction - GST Tax Structure

E-Way Bill - GST e-Invoicing - Benefits of e-invoice to the businesses - Generating E-Way bill with e-Invoice - Role of e-Invoice in GST Returns - Various modes of generating e-invoice

Activation of GST in Tally - Creation of Company and Activating GST

Tax Deducted at Source - Basic Concepts of TDS - Activation of TDS in Tally.

23D02-103 – ADVANCED BUSINESS ACCOUNTING

Theory Hours - 50 Hrs

Module I – Computers and Accounting (8 Hrs)

Learning Outcome

- Understand the usage of computers for accounting
- Know about the Accounting Information System and its importance
- Learn the relationship between Data Base Management System and Accounting
- Exposure through different ERP systems

Topics

Computers and Accounting – Introduction – Accounting Information System – Features – Objectives – Role of Computer in Accounting and Automation – Software for Accounting – Framework of Accounting Software – Grouping of Accounts – Electronic Spreadsheet – Accounting and DBMS – Entities and Relationship in an Accounting System-Introduction to ERP systems.

Module II – Asset Management (12 Hrs)

Learning Outcome

- Understand the concept of depreciation
- Know the methods of depreciation
- Valuation of inventory

Topics

Depreciation Accounting – Meaning – Components – Causes – Need – Measurement of Depreciation – Methods of Depreciation

Inventory Valuation – meaning – Techniques of Inventory Valuation

Bank Reconciliation statement – Advantages of keeping Bank Account – Meaning and Objective – Causes of Difference Techniques.

Module III – Inventory Management (10 Hrs)

Purchase and Sales Order Management – Introduction – Purchase Order Processing – Recording of Purchase Order – Recording of Receipt Note Voucher – Recording Rejections Out Voucher – Recording Purchase Voucher – Recording Debit Note Voucher – Recording Payment Voucher –

Sales Order Processing – Recording of Sales Order In Tally – Recording Delivery Note Voucher – Recording Rejections In Voucher – Recording of Sales Voucher – Recording Receipt Voucher – Order Outstandings – Sales Order Outstanding – Purchase Order Outstanding – Pre-Closure of Orders – Reorder Level – Display Reorder Status – Godown Transfer in Tally – Cost/Profit Centres Management – Introduction – Cost Centre and Cost Categories – Activation of Cost Centre – Allocation of Expenses and Incomes using Cost Centre – Cost Centre Reports.

Module IV - Budget and Scenarios (8 Hrs)

Learning Outcome

- Learn preparation of budget
- Generation of various financial and managerial reports in Tally

Topics

Budgets and Scenarios – Introduction – Creation of Budget – Recording Transactions – Display Budgets and Variances Reports for Group Budget – Generating and Printing Reports – Introduction – Inventory Reports – Stock Summary – Godown-wise Stock Availability – Movement Analysis – Financial Reports – Balance Sheet – Profit & Loss A/c – Books & Registers – Sales Register – Purchase Register – Printing of Invoice and Report.

Module V - GST (12 Hrs)

Learning Outcome

- Learn different forms of taxation
- Understand the emergence of GST and its various types
- Study the process of e-way bill generation

Topics

Taxation – Introduction – Direct and Indirect Taxation – Merits and Demerits – Value Added Tax – Introduction – Forms of value Added Tax – Problems of VAT in India – Reasons for Rejection of VAT

Goods and Service Tax – History of GST – The Scope of GST – Definition and Meaning – CGST – IGST – SGST – Levy and Collection of GST

Tax Invoice, Credit and Debit Notes – E-Way Bill – Components of E-Way Bill – Who must generate E-Way Bill – Validity of E-Way Bill – E-Way Bill Process Flow.

23D02-104 – E-COMMERCE AND LOGISTIC MANAGEMENT

Theory Hours - 50 Hrs

Module I - Introduction to E-Commerce (10 Hrs)

Learning Outcome

- Understand the concept of e-commerce and related terms in detail
- Compare e-commerce and traditional commerce in different sectors
- Understand the Electronic Data Interchange and its importance in commerce

Topics

Introduction to E-Commerce – Meaning – Principles and Applications – E-Commerce v/s Traditional Commerce – E-Business – E-Business skills and Culture – Features and Benefits – Impact – Future Challenges and Opportunities – Approach to Safe E-Commerce – E-Commerce in Service Industry – EDI – Benefits and Importance.

Module II - E-Business (10 Hrs)

Learning Outcome

- Know E-Business and models of E-Business
- Understand the strategies of marketing in E-Commerce
- Learn the concept of internet advertising and its models
- Know mobile commerce

Topics

Business Models of E-Commerce – Business to Business – Business to Customer – Business to Government – Business to Employee
E-Commerce Strategy – Influencing Factors – E-Business Infrastructure – E-Commerce Marketing Strategies – Components – Design
Internet Advertising – Models of Internet Advertising – Weakness – Mobile Commerce.

Module III - E-Commerce and Online Payments (10 Hrs)

Learning Outcome

- Understand the basics of online payment system
- Know different modes of making online payment
- Understand the issues in electronic payments and solutions for such issues
- Study the ethical aspects in electronic payment and regulatory framework in India

Topics

Electronic Payment System – Introduction – Online Payment System – Payment Processing Principles – Electronic Fund Transfer – Prepaid and Postpaid Payment System – E-Cash – E-Cheque – Smart Card – Credit Card – Debit Card – Electronic Purse
Security Issues in Electronic Payment System – Solutions – Biometrics – Types of Biometrics
Legal and Ethical issues in E-Commerce
Regulatory Framework of E-Commerce.

Module IV - Logistic Management (10 Hrs)

Learning Outcome

- Understand the term logistics and its importance
- Learn the concept of supply chain management and components
- Understand the cost concepts related with logistic management
- Create basic idea about containerisation and multimodal transportation

Topics

Logistic Management – Concept – Scope – Importance – Need – Logistic Activities
Supply Chain Management – Structure – Transportation – Modes of Transportation – Logistics and Economy
Containerisation and Multimodal Transportation
Understand Cost Concepts in logistics

Module V - Stock Management (10 Hrs)

Learning Outcome

- Understand warehouse and warehouse management system
- Know inventory management methods of measurement
- Basic knowledge on material handling
- Understand the basic principles of insurance

Topics

Warehousing – Meaning – Nature – Importance – Types – Advantages – Warehouse Management System – Inventory Management – Concepts – Measurement Methods – JIT – Packaging – Meaning – Functions – Role – Material Handling – Scope – Objectives – Importance – Principles – Insurance – Importance – Types – Principles.

DETAILED SYLLABUS (LAB)

SYLLABUS FOR LAB

23D02-105 LAB I - TALLY LEVEL - I AND OFFICE PACKAGES

Lab Hours - 150 Hrs

PART 1- Tally (60 Hrs)

Introduction to Accounting

1. Preparation of journal entry, ledger and final accounts from the given business transaction. (at least 25 transactions, with basic adjustments)
2. Preparation of bank reconciliation statement

Introduction to Tally

1. Create company details in Tally
2. Prepare inventory masters and basic details in Tally
3. Practice on migration of company data from old version to new version of Tally

Inventory Management

1. Creation of inventory masters in Tally

Accounts Management

1. Maintenance of bill-wise entry in Tally
2. Generation of bills payable and receivable reports in Tally
3. Preparation of reminder letter in Tally

GST and TDS

1. Generation of e-invoice in Tally
2. Activation of GST in Tally
3. Activation of TDS in Tally

PART 2 - Office Packages (90 Hrs)

Word Processor (20 Hrs)

1. Explore the Word Processor Interface, Toolbars, Ribbon, and Menus
2. Typing, selecting, copying, and deleting text
3. Familiarize on Creating and Formatting Documents
4. Working with Objects and familiarising Mail Merge
5. Understanding Page Layout Settings, Apply watermarks on documents

Presentation (20 Hrs)

1. Familiarizing with the presentation window
2. Working with Slides: creating slides, running slides, Creating custom slide show
3. Manipulation of Slide Contents
4. Transitions and Animations
5. Sharing a Presentation

Spreadsheet Basics (20 Hrs)

1. Familiarize with Spreadsheet Basics and Manipulations
2. Work with Formatting and Spreadsheet Calculations
3. Understand sorting and filtering of data
4. Understand Preview and Print, Page Setup
5. Understand and choose appropriate spreadsheet extension formats for different scenarios

Spreadsheet Advanced (30Hrs)

1. Understanding data validation techniques to ensure data accuracy
2. Understand the basics of logical functions, statistical functions, date/time functions, text functions
3. Apply conditional formatting for visual data analysis
4. Practice extracting specific records with Advanced Filter techniques
5. Understand how to link data between different spread sheets
6. Understand Advanced page configuration for optimal printing in diverse scenarios
7. Understand the concept of Pivot Tables for dynamic data analysis
8. Create and manipulate various types of charts for data visualization
9. Understanding Mail Merge using work sheet data
10. Explore workbook sharing options and protect sheets/workbooks with passwords

23D02-106 – LAB II – TALLY LEVEL – II AND SPREADSHEET

Lab Hours - 150 Hrs

PART 1 - Tally (90Hrs)

Asset Management

1. Entry of depreciation in Tally
2. Prepare fixed asset register report

Inventory Management

1. Purchase order and sales order processing in Tally
2. Activation of cost centre
3. Preparation of reports of cost centre

Budgets and Scenarios

1. Preparation of budgets in Tally
2. Generation of different budgets in Tally
3. Generation of final accounts and maintenance of purchase and sales register in Tally

GST

1. Preparation of a dummy e-way bill
2. Recording of TDS in Tally

PART 2 – Advanced Spreadsheet (40Hrs)

1. Familiarize with spreadsheet advanced editing techniques for efficient data correction and manipulation
2. Work with advanced formatting options, including conditional formatting and custom number formats
3. Gather basic knowledge on advanced applications of the Auto Sum feature for comprehensive data analysis
4. Understanding about LOOKUP functions and math functions
5. Familiarize with basic operations in Google Sheets
6. Understand the features and tools offered by Microsoft Office 365
7. Explore basic AI tools available in spreadsheet for data analysis
8. Prepare student data base in spreadsheet
9. Identify popular open access accounting software and identify the practical issues in usage of these packages
10. Prepare final accounts using spreadsheet

PART 3 – Case Study (20Hrs)

Create a company and prepare minimum 50 business transactions and record it in journal, prepare the final accounts, make bill wise entry, cost centres, budgets, sales and purchase orders and TDS on assumed transactions.

ASSIGNMENTS FOR THEORY AND QUESTIONS FOR LAB

ASSIGNMENTS FOR THEORY

Paper 1(Theory)

23D02-101- COMPUTERS & OFFICE PACKAGES

Module I – Computer Fundamentals

1. Explain the main components of a computer's hardware and elaborate on their roles in the overall functioning of a computer system.
2. Discuss the various types of software, highlighting the differences between system software and application software.
3. Discuss about OEM software, freeware, proprietary software and open source software.
4. Explore methods for detecting and preventing malware infections. Discuss the role of antivirus software in maintaining computer security.
5. Explain the concept of cloud computing and its advantages. Discuss how cloud computing can be utilized in different scenarios.
6. Describe the concept of a digital signature certificates (DSC) and its applications in ensuring data integrity and authenticity.
7. Examine the importance of data security in the era of digital documentation.
8. Provide an overview of the Information Technology Act, focusing on its objectives, features, and offenses it addresses.

Module II – Overview of Internet

1. Define computer networks and classify them into different types. Explain the key components of computer networks.
2. Elaborate on the functions of HTTP (Hypertext Transfer Protocol) and FTP (File Transfer Protocol) in web communication. Discuss their importance in facilitating data exchange on the Internet.
3. Explore the concept of the World Wide Web (WWW) and its role in information dissemination.
4. Discuss web browsers and their features. Examine the functioning of search engines and search tools, emphasizing their impact on information retrieval.
5. Discuss how Intranets can break down barriers within an organization
6. Discuss the impact of IT on various industries, exploring opportunities and threats. Delve into the principles of cyber ethics and the challenges posed by security, privacy issues, and cyber addictions.

Module III - Word Processor & Presentation

Word Processor

1. Explore the components of a word processor interface, including toolbars, ribbons, and menus.
2. Discuss the process of creating a new document, including typing text, selecting, copying, and deleting text.
3. Discuss on text formatting techniques such as bold, italic, underline, strikethrough, and alignment adjustments.
4. Discuss the significance of the Clipboard, Cut, Copy, and Paste operations.
5. Explain the following: text effects, highlighting, font colors, changing text case, and aligning text.
6. Explain about inserting pictures, shapes, symbols, and text boxes into documents.
7. Explain about header, footer, foot note and end note.
8. Explain how to use tables in word document.
9. Explain about page numbering, watermarks. Discuss the application of page borders.
10. Describe on configuration of page setup options, including setting margins, page orientation, and paper size.

Presentation

11. Brief on the process of creating a new presentation.
12. Explain on inserting new slides, selecting slide layouts, copying slides, and setting slide backgrounds. Cover applying themes to slide layouts and making duplicate slides.
13. Explore manipulation of slide contents, including text boxes, text formatting, bullet points, pictures, shapes, word art, charts, grouping objects, and inserting headers and footers.
14. Explain how to apply slide transitions, custom animations, and setting timing.
15. Explain how to use templates in presentation.
16. Explain creating an image from a presentation, printing a PowerPoint presentation, and broadcasting a presentation.

Module VI - Spreadsheet Basics

1. Define components of a workbook, including worksheets, cells, and cell addresses.
2. Explain on formatting cell contents, setting font, font size, style, font color, bold, italic, and underline.
3. Explain cell alignments, text wrap, merging and centering cells, formatting cell values, copying formatting with the Format Painter, applying borders, and applying a cell style.
4. Discuss on using Auto Sum, creating formulas, and using basic functions in a spreadsheet.
5. Write a short note on: Cover page setup, setting print area and print titles, print preview, setting print options, printing an entire workbook, and understanding spreadsheet extension formats.

Module V - Spreadsheet Advanced

1. Demonstrate the process of entering data in a list using Data Validation
2. Explore logical functions, including IF and nested IF functions, and the application of AND, OR, and NOT functions in decision-making
3. Apply date/time functions like TODAY, NOW, and DATE to manage and manipulate temporal data
4. How to utilize statistical functions such as AVERAGE, COUNT, SUMIF, and COUNTIF for data analysis
5. Explore text functions including MID, LEFT, RIGHT, TRIM, UPPER, and LOWER for text manipulation
6. How to implement math functions like FLOOR, CEILING, and MROUND for mathematical operations
7. Apply LOOKUP functions such as VLOOKUP and HLOOKUP for searching and retrieving data
8. How one can implement conditional formatting to visually enhance data representation
9. Explore the removal of duplicates, creation of pivot tables, and manipulation of data through various spreadsheet features
10. Write the steps involved in creating and manipulating charts to effectively visualize data trends and patterns
11. Explore different chart types and formatting options for clear and impactful data presentation
12. How can you import an address list from an workbook file for mail merging purposes?

13. Explore sharing workbooks, protecting sheets, workbooks, and linking spreadsheets for data consistency.
14. Compare and contrast the functionalities of Excel with Google Sheets.
15. Discuss the application of AI features in automating tasks and improving decision-making processes.

Paper 2(Theory)

23D02-102 - BUSINESS ACCOUNTING

Module I - Introduction to Accounting

1. What is accounting?
2. Explain the characteristics of accounting
3. What are the objectives of accounting?
4. What are the functions of accounting?
5. Which are the branches of accounting?
6. Describe the principles of accounting
7. Explain GAAP
8. Explain the procedure of preparation of final accounts

Module II - Introduction to Tally

1. Explain the features of Tally
2. Explain the flowchart of a new company data in Tally
3. How to alter and delete master data in Tally?

Module III - Supply Chain & Inventory Management

1. What is inventory?
2. What is supply chain?
3. Explain the types of supply chain
4. What is the importance of inventory management?

Module IV - Accounts Management

1. What are accounts receivables and account payables?
2. Explain the procedure of generating reminder letter in Tally related to payables

Module V - GST and TDS

1. What is GST?
2. What is E-way bill?
3. Explain the advantages of e-invoice in business
4. Describe the importance of e-invoice in GST returns
5. What is TDS?

Module I – Computers and Accounting

1. Explain the importance of computers in accounting
2. What is Accounting Information System?
3. What are the different software packages available for accounting?
4. What is spreadsheet?
5. Explain the entities and relationship in an accounting system

Module II – Asset Management

1. What is depreciation?
2. What are the components of depreciation?
3. Explain the need of depreciation.
4. What are the different methods of depreciation?
5. What is inventory valuation?
6. Explain the techniques of inventory valuation.
7. What is bank reconciliation statement?
8. Explain the advantages of keeping bank account.

Module III – Inventory Management

1. Explain the activities in purchase orders and sales order processing.
2. What is cost centre?

Module IV - Budget and Scenarios

1. What is budget?
2. What are different types of budgets?
3. How to generate reports of final accounts in Tally?

Module V - GST

1. What is Tax? Explain the types of tax with detailed examples.
2. What is VAT?

3. What are the drawbacks of VAT in India?
4. Explain the history of GST.
5. Describe the scope of GST
6. What are the components of e-way bill.
7. Explain the e-way bill process flow.

Module I - Introduction to E-Commerce

1. What is E-Commerce?
2. Explain the principles and applications of E-Commerce.
3. Differentiate E-Commerce and Traditional Commerce.
4. What are the features and benefits of E-Commerce?
5. Explain the challenges and opportunities of E-Commerce.
6. What is EDI? Explain.

Module II - E-Business

1. Explain the models of E-Commerce.
2. What are the different strategies of E-Commerce?
3. What is internet advertising?
4. What are the models of internet advertising?
5. Explain the drawbacks of internet advertising.
6. Prepare a note on Mobile commerce.
7. What are the factors involved in E-Business Infrastructure?

Module III - E-Commerce and Online Payments

1. What is electronic payment system?
2. What are the principles of electronic payment system?
3. What is E-Cash?
4. Prepare a note on E-Cheque.
5. What is the difference between debit card and credit card.
6. What are the security issues in electronic payment system?
7. What are the different methods to overcome the security issues in electronic payment system.
8. Prepare a note on regulatory framework on E-Commerce.
9. Develop a new product and all aspects of that product with an intension to perform all the business activities over online platforms.

Module IV - Logistic Management

1. What is logistic management?
2. Explain the need and scope of logistic management.
3. Explain the structure of supply chain management.
4. What are the different modes of transportation and explain the advantages and disadvantages of each mode of transportation.
5. What is containerisation?
6. Write a note on multimodal transportation.
7. What are the three concepts of cost in logistic management?

Module V - Stock Management

1. What is warehousing?
2. What are the types of warehouses?
3. What is inventory management?
4. Explain different methods in inventory management.
5. What is JIT?
6. What are the functions and role of packaging of a product?
7. What are the principles of material handling?
8. What is insurance and explain the principles of insurance.
9. What are different types of insurance?

QUESTIONS FOR LAB

23D02-105 LAB I - TALLY LEVEL - I AND OFFICE PACKAGES

Lab Hours - 150 Hrs

PART 1- Tally (60 Hrs)

Preparation of ledger

1. Prepare ledger with the following transactions.

i)	Purchased goods for cash	10,000
ii)	Purchased stationary	500
iii)	Purchased Furniture	3,000
iv)	Sold good for cash	8,000
v)	Sold goods to Geetha	3,000
vi)	Paid rent	800
vii)	Sold goods to Latha	2,000
viii)	Paid Salary	8,000
ix)	Goods Sold	50,000
x)	Commission Paid	1,000

2. Consider the following transactions

Debit balance on January 1 2012

Cash in hand	8000
Cash at bank	25000
Stock of goods	20000
Building	10000
Debtors vijay	2000
Madhu	2000

Credit balance on January 1 2012

Creditors Anand 5000

Capital 55000

Further transactions in the month of January 2012

Jan 1 purchased goods worth rs 5000 for cash less than 20%
 trade discount and 5% cash discount

- Jan 4 Received 1980 from vijay and allowed him 20 as discount
- Jan 8 Purchased plant from Mukesh for rs 5000 and paid 100 as cartage for bringing the plant to the factory and another 200 as installation charge
- Jan 12 Sold goods to Rahim on credit rs 600
- Jan 15 Rahim became insolvent and could pay only 50 paise in a rupee
- Jan 18 Sold goods to Ram for cash rs 1000

Prepare ledger accounts

Preparation of journal entry

1. Raju is a sole proprietor having a provisions store. Following are the transactions during the month of January, 2018. Journalise them.

- Commenced business with cash 80,000
- Deposited cash with bank 40,000
- Purchased goods by paying cash 5,000
- Purchased goods from Lipton & Co. on credit 10,000
- Sold goods to Joy and received cash 11,000
- Paid salaries by cash 5,000
- Paid Lipton & Co. by cheque for the purchases made on 4th Jan.
- Bought furniture by cash 4,000
- Paid electricity charges by cash 1,000
- Bank paid insurance premium on furniture as per standing instructions 300

2. Ananth is a trader dealing in textiles. For the following transactions, pass journal entries for the month of January, 2018.

- Commenced business with cash 70,000
- Purchased goods from X and Co. on credit 30,000
- Cash deposited into bank 40,000
- Bought a building from L and Co. on credit 95,000
- Cash withdrawn from bank for office use 5,000
- Cash withdrawn from bank for personal use of Ananthu 4,000
- Towels given as charities 3,000
- Shirts taken over by Ananth for personal use 12,000
- Sarees distributed as free samples 3,000
- Goods (table clothes) used for office use 200

3. Babu is a trader dealing in electronic goods who commenced his business in 2015. For the following transactions took place in the month of March 2018, pass journal entries.

o Purchased goods from Y and Co. on credit	60,000
o Sold goods to D and Co. on credit	30,000
o Paid Y and Co. through bank in full settlement	58,000
o D and Co. accepted a bill drawn by Bragathish	30,000
o Sold goods to L on credit	20,000
o Sold goods to M on credit	40,000
o Received a cheque from M in full settlement and deposited the same to the bank	39,000
o Goods returned to Y and Co.	4,000
o L became insolvent and only 90 paise per rupee is received by cash in final settlement	
o Goods returned by M	3,000

Preparation of final accounts

1. From the following particulars taken out from the books of Abdul Hanan & Co. You are required to prepare Trading and Profit & Loss Account and Balance Sheet as at December 31, 2019.

Sundry debtors	Rs. 52,000	Insurance premium (paid on 1.10.19)	Rs. 2,400
Account payable	22,000	Cash at bank	6,200
Cash in hand.	2,392	Machinery	24,000
Furniture	3,500	Wages	23,600
Motor car	22,000	General expenses	2,680
Purchases	145,000	Carriage inward	2,040
Sales	292,000	Carriage outward	1,630
Sales return	2,600	Transportation in	6,430
Salaries	8,420	Owner equity	20,000
Opening stock	11,400	Drawing	8,000
Motor car expenses	3,600	Rent and taxes	3,600
Equipment	2,508		

Adjustments:

- Closing stock Rs, 35,000.
- Provision for doubtful debts at 5% of sundry debtors.
- Depreciation furniture and machinery by 10%.
- Commission of Rs. 3,600 has been earned but not received till the closing of accounts.

2. AMCR Corporation provides following details.

The following were the balances extracted as on March 31, 2014:

Debit Balances	Amount	Credit Balances	Amount	Rs
Cash in hand	540	Sales	98,780	
Cash at bank	2,630	Return outwards	500	
Purchases	40,675	Capital	62,000	
Return inwards	680	Sundry creditors	6,300	
Wages	8,480	Rent	9,000	
Fuel and Power	4,730			
Carriage on sales	3200			
Carriage on purchases	2040			
Opening stock	5,760			
Building	32,000			
Freehold land	10,000			
Machinery	20,000			
Salaries	15,000			
Patents	7,500			
General expenses	3,000			
Insurance	600			
Drawings	5,245			
Sundry debtors	14,500			

Taking into account the following adjustments prepare trading and profit and loss account and balance sheet as on March 31, 2014:

- Stock in hand on March 31, 2014, was Rs. 6,800.
- Machinery is to be depreciated at the rate of 10% and patents @ 20%.
- Salaries for the month of March, 2014 amounting to Rs. 1,500 were outstanding.
- Insurance includes a premium of Rs. 170 on a policy expiring on September 30, 2014.
- Further bad debts are Rs. 725. Create a provision @ 5% on debtors.
- Rent receivable Rs. 1,000

Bank reconciliation statement

1. From the following information prepare bank reconciliation statement as at 31/12/2011 for NC limited

- Bank over drafted as per cash book on 31/12/2011 245900
- Interests debited by bank on 26/12/2011 but no advice received 27870
- Cheque received before 31/12/2011 but not yet presented to bank 66000
- Transport subsidy received from the state government directly by the bank but not advised to the company 42500
- Draft deposited in the bank but not credited till 31/12/2011 13500
- Bills for collection credited by bank till 31/12/2011 but no advice received by the company 83600
- Amount wrongly debited to the company account by the bank, for which no details are available 7400

2. On January 31, 2024, the balance as per the bank statement is Rs 10,000. However, the balance as per the cash book is Rs. 9,500. The following differences are noted.
- Bank charges of Rs. 50 were debited by the bank.
 - A check for Rs. 300 was issued but not yet presented for payment.
 - Interest of Rs. 20 was credited by the bank
 - A check for Rs. 100 was issued but not yet presented for payment

Prepare a bank reconciliation statement in Tally Prime

3. From the following particulars prepare a Bank Reconciliation Statement to find out the causes of difference in two balances as on August 31st, 2016 for Blue Star (Pvt.) Ltd.

- Bank Overdraft as per Bank Statement 17,000
- Check issued but not encashed during the August 2,200
- Dividends on shares collected by banker 2,300
- Interest charged by the bank recorded twice in the Cash Book 500
- Check deposited as per Bank Statement not entered in Cash Book 3,400
- Credit side of the Bank column in Cash Book cast short 1,000
- Clubs dues paid by bank as per standing instruction not recorded in Cash Book 1,200
- Uncredited check due to outstation 3,900

Preparation of inventory masters in tally

I) Stock group

1. Prepare stock group with the following details

Stock Group	Under
System	Primary
Parts	Primary
Mother Board	Parts
CD Rom	Parts
Eight Speed	CD Rom
Ten Speed	CD Rom
Software	Primary
Ace	Software
King	Software
Queen	Software

1) Create a stock group named "Electronics" in Tally Prime for a retail company named "PPG Electronics Store."

- Under the "Electronics" stock group, create subgroups for different types of electronic products, such as "Smartphones," "Laptops," and "Televisions."
- Assign appropriate stock items to each subgroup. For example, under "Smartphones," include items like "iPhone 12," "Samsung Galaxy S21," etc.
- Set the appropriate tax rates and other relevant details for each stock item within their respective subgroups.
- Ensure that the stock group structure is organized and logical, making it easy to manage and track inventory within Tally Prime.
- Provide a detailed explanation of the steps involved in creating the "Electronics" stock

group and its subgroups, including any necessary configurations or settings adjustments within Tally Prime.

II) Stock item creation

1. Create a stock item named "Laptop" in Tally Prime for a retail store named "TechTarget's." The laptop has the following details:

Item Code: LT001

Description: Laptop - Dell Inspiron 15

Unit of Measurement: Each

Selling Price: ₹50,000

Cost Price: ₹40,000

Tax Rate: 18%

Quantity in Stock: 10

Provide step-by-step instructions on how to create this stock item in Tally Prime, including any necessary fields to fill in and settings to configure.

2. Tech Pharma Ltd. needs to track its inventory of medicines by batch numbers. Create a stock item named "Paracetamol 500mg Tablets" in Tally Prime with batch-wise details. The item details are as follows:

Item Code: PAR001

Description: Paracetamol 500mg Tablets

Unit of Measurement: Strip (10 tablets per strip)

Selling Price per Strip: ₹20

Cost Price per Strip: ₹15

Tax Rate: 12%

Additionally, the company has received three batches of this medicine with the following details:

Batch Number: 2023A, Quantity: 500 strips

Batch Number: 2023B, Quantity: 300 strips

Batch Number: 2023C, Quantity: 700 strips

Provide detailed instructions on how to create the "Paracetamol 500mg Tablets" stock item in Tally Prime, including how to enable batch-wise details and input the batch numbers and quantities received.

III) Unit of measure creation

Compound Unit of Measure Creation:

1. A construction company, "BuildPro Constructions," needs to track materials in bags and tonnes. Create a compound unit of measure named "Bags (50 kg)" in Tally Prime, where 1 bag equals 50 kilograms. Additionally, create a compound unit named "Tonnes" where 1 tonne equals 1000 kilograms. Provide detailed instructions on how to create these compound units of measure in Tally Prime, including how to set up the conversion factors and any other relevant settings.

Activation of cost centre and cost category

1. The rent is 1000 and there are two categories production dept and service dept. the cost centre for prod dept is A, B & C and the cost centre for service dept is D. now they want to allocate the rent as follows A-325, B-225 C-125 & D- 325 for two cost categories (production and service).

Prepare cost centre

2. Create the following COST CATEGORIES

Branch

Telephone

Employee

Create the following COST CENTERS

Rajam, Palakonda, Amadalavalasa, Srikakulam Under Branch

7989895101 & 8897889984 Under Telephone

Tarak, Vijay, Somesh, Siva Under Employee

Create the following VOUCHERS with using COST CENTERS and COST CATEGORIES

Commission Received in Cash – Rs. 50,000/- (From – Branch – Rajam 10,000/-, Srikakulam 5,000/-, Palakonda – 15,000/- and Amadalavalasa – Rs. 20,000/-

Telephone Charges Paid in Cash – Rs. 500/- (For 7989895101 – Rs. 400/- and for 8897889984 – Rs. 100)

Salaries Paid in cash – Rs. 80,000/- (Rs. 20,000/- for Tarak, Rs.20,000 for Vijay, Rs. 20,000 for Somesh and Rs.20,000 for Siva)

Maintaining bill wise details in tally

1. Debtors statement (ABC Solutions & Co.) as below :

Date	Bill No.	Bill Date	Due Date	Bill Amt	Paid Amt	Remarks
01.01.2019	159	01.04.2019	01.05.2019	5,800		Sales
01.05.2019	852	01.05.2019	31.05.2019	7,400		Sales
02.05.2019	582	01.05.2019			7,400	Ch. 123001

You are required to prepare bill details in Tally

PART 2 - Office Packages (90 Hrs)

Word Processor: (20 Hrs)

1. Create a new document in a word processor. Type a paragraph of text and apply different formatting options such as bold, italic, underline, and font changes. Experiment with text alignment, spacing, and indentation for paragraphs. Apply various text effects, highlighting, and font colors. Insert a picture or shape into the document. Save the document with a meaningful name.
2. Insert a text box into the document and add text inside it. Add a header and footer to the document. Apply watermarks and page borders. Insert footnotes and endnotes.
3. Open a new document and type the following text in the document and format it as per the instructions given below.

BROWN LIKE DOSAS SAMOSAS & STICKY CHIKKI

Moral: Beauty comes in all shades

This story revolves around young girl Samaira, a young girl with caramel skin who loves the colour brown. One night, she tumbles into a magical realm where she encounters a dilemma pertaining to the colour of her skin, in which she has never seen any flaws.

A strange purple lady with magic powers, Anahi, makes Samaira a very unusual offer. She tells Samaira that if she'd like, the purple lady could lighten the colour of her skin. This did not appeal to Samaira whatsoever! In fact, she elaborated why she took pride in her skin tone, the way her mother had always taught her to. Each time the purple lady offers Samaira lighter skin, she respectfully declines and expresses that her self-worth and beauty cannot be defined by the colour of her skin.

This mature reaction sets a great example for kids reading the story as it teaches them to be patient and reject an idea in a respectful manner when it doesn't align with their beliefs. Samaira's assertiveness is inspirational and is an uplifting example of standing up for what you believe is right.

The story in simple English is extremely insightful and a must read for both, children and adults. It addresses one of the world's most complex issues – unrealistic beauty standards. The book does this in a very appropriate manner that will stimulate a child's mind – thereby acting as a tool in shaping their core beliefs. It is an empowering tale for all those who have faced issues with discrimination. It paves a path to self-confidence for these individuals. Join Samaira on her journey of self-discovery up on the fluffy cloud in the GetLitt! Library.

- a) Select the heading 'Brown Like Dosas Samosas & Sticky Chikki' and change the font to 'ALGERIAN', font size to '18' and colour 'Blue'.
 - b) Change the line spacing of the paragraph from single to double.
 - c) Add a page number at the bottom of the page.
 - d) Apply bold and underline formatting effects on the heading 'Brown Like Dosas Samosas & Sticky Chikki'.
 - e) Select the text and justify the text.
 - f) Also remove the grammatical and spelling mistakes in the document, if there are any.
 - g) Select the moral of the document, cut and paste it at the end of the document.
 - h) Select the first two lines of the paragraph and convert it to uppercase.
 - i) Change all the uppercase letters to lowercase and vice-versa.
 - j) Change the font style of the last two lines to 12 pts and also apply bold and italic options on to these lines.
 - k) Copy this format to the first line using the Format Painter.
 - l) Highlight the moral of the story in green colour using the highlighter.
4. Create a news-paper document with at least 200 words,
- a) Use margins as, top:1.5, bottom:2, left:2, right:1 inches.
 - b) Use heading "Gandhi Jayanti", font size: 16, font color: red, font face: Arial Black.
 - c) With first letter "dropped" (use drop cap option) of the first paragraph containing a picture at the right side
 - d) Use three columns from the second paragraph onwards till the half of the page.
 - e) Then use heading "Computer basics"
 - f) Create paragraph using two columns till the end of the page.
5. Write an invitation letter to HR Managers of five different companies requesting them to join the annual meet using Mail Merge.
5. Create a Table Student using Table Handling feature, include five columns and five rows taking your own data.
- a) delete a row and a column
 - b) insert a row and a column.
6. Create a Mathematical question paper using, at least five equations
- a) With fractions, exponents, summation function
 - b) With at least one "m*n" matrix
 - c) Basic mathematical and geometric operators.
 - d) Use proper text formatting, page color and page border.

Presentation: (20 Hrs)

1. Create a presentation with minimum 5 slides.
 - a) The first slide must contain the topic of the presentation and name of the presentation.
 - b) Must contain at least one table.
 - c) Must contain at least 5 bulleted or 5 numbered list.
 - d) The heading must be, font size:32, font-face: Arial Rounded MT Bold, font-color: blue.
 - e) The body must be, font size: 24, font-face: Comic Sans MS, font-color: green.
 - f) Last slide must contain “thank you”.
2. Create a presentation with minimum 10 slides
 - a) Use word art to write the heading for each slides.
 - b) Insert at least one clip-art, one picture
 - c) Insert at least one audio and one video
 - d) Hide at least two slides
3. Create a presentation with minimum 5 slides
 - a) Use custom animation option to animate the text; the text must move left to right one line at a time.
 - b) Use proper transition for the slides.
4. Create a new presentation. Choose a template for the presentation. Insert several slides with different layouts. Add text to slides and format it accordingly. Insert pictures, shapes, and WordArt into the slides. Apply transitions between slides. Add animations to specific slide elements. Save the presentation in a specific format.
5. Convert the presentation to PDF. Print a specific number of slides from the presentation.

Spreadsheet Basics (20 Hrs)

1. Create a new spreadsheet. Enter text and numbers into cells. Select and manipulate cells, rows, and columns. Save the workbook with a meaningful name.
2. Open an existing spreadsheet. Edit cell contents and use Undo and Redo functions. Utilize Cut, Copy, and Paste commands. Complete a series using AutoFill. Save the workbook.
3. Open an existing spreadsheet. Format cell contents by setting font, font size, style, and color. Apply different alignments and text wrap. Merge and center cells. Apply borders, cell styles, and document themes. Set headers and footers in a worksheet. Save the workbook.
4. Prepare the following spreadsheet :

Number of Schools in Selected Cities of Kerala

District	Secondary	Primary	Total
Kannur	68	114	
Kozhikode	124	186	
Wayanad	78	64	
Kasaragod	39	84	
Thrissur	139	184	
Palakkad	126	129	
Ernakulam	52	109	
Kottayam	120	180	
Kollam	145	220	
Thiruvananthapuram	178	238	
Total			

After completion of the above workbook do the following:

- Save the workbook with name **School**.
- Find out total number of schools in each district.
- Also calculate total number of secondary school and primary school using SUM function.
- Select cell containing column titles and align them to centre by clicking on Paragraph group and clicking on Centre Alignment text and also make them Bold.

5. Open the spreadsheet created in the above exercise. Do the following:

- Increase the column width of the column A to so as to accommodate complete text in column.
- Increase column width of B, C and D together to accommodate data.
- Find out average number of secondary school using function of
average=AVERAGE(RANGE)
- Copy this formula across to calculate average for primary and total number

- e) Insert a column before District
 - f) Add Sl.NO. as column title and enter numbers from 1
 - g) Add cells for minimum and maximum number of schools and calculate values these values. (Use =MIN(RANGE) and =MAX(RANGE))
 - h) Insert a row between Kottayam and Kollam Districts.
 - i) Add following data in the blank row
Alappuzha 112 158
 - j) Copy formula of total from Kottayam to Alappuzha in column E
 - k) Now check whether the Total, Average and Minimum are automatically changed.
 - l) Change the value of Secondary schools to Ernakulam from 52 to 139 and see where the result changes.
 - m) Make Title of the table and heading row BOLD and Centre. Save the worksheet.
 - n) Insert a row between Kottayam and Ernakulam Districts.
 - o) Add following data in the blank row
Pathanamthitta 93 102
Idukki 23 67
 - p) Try learning Merge and Centre
 - q) Add a column after Total with heading % of Primary Schools to Total.
 - r) Calculate above value (Hint: cell references of Primary Schools/ Total * 100)
6. Once % is calculated copy this to rest of the cells (down)Open the spreadsheet **School**. Prepare a COLUMN chart-taking District on the X- axis and number of Secondary Schools on the Y-axis

Spreadsheet Advanced(30Hrs)

1. Create a list of items in a column. Use data validation to restrict the entries in the list to specific criteria. Apply the IF function to evaluate a logical condition and display different results. Use the AND, OR, and NOT functions to perform logical operations on data.
2. Calculate the average and count of a range using the AVERAGE and COUNT functions. Apply the SUMIF and COUNTIF functions to selectively sum or count data based on specific conditions.
3. Utilize text functions (MID, LEFT, RIGHT, TRIM, UPPER, LOWER) to manipulate text in cells. Apply mathematical functions (FLOOR, CEILING, MROUND) for numeric calculations. Use Advanced Filters to extract specific records from a dataset.

4. Import an address list from an Excel file for mail merging in Word to send personalized grade reports.
5. Create a Pivot Table to summarize and analyse data. Generate charts to visually represent data trends.
6. Share the workbook with a classmate and collaborate on entering additional data. Protect a specific worksheet containing sensitive information with a password.

23D02-106 LAB II-TALLY LEVEL - II AND SPREADSHEET

Lab Hours - 150 Hrs

PART 1- Tally (120 Hrs)

Budget creation:

1. The Following Would Be Recording In Journal Using Double Entry System. Do The Posting Process From Journal Entries And Prepare The Trial Balance, Trading A/C, Profit & Loss A/C And Balance Sheet In The Books Of M/S. INFOSYS LTD For The Following Year 2009 To 2010

Particular	Dr	Cr
Capital		500000
Cash	250000	
Bank Loan		100000
Profit & Loss A/C		50000
Accounts Receivable	50000	
Axis Bank	150000	
Machinery	75000	
Plant & Machinery	150000	
Good Will	125000	
Bank O /D		100000
Debentures		50000
Total	800000	800000

Transaction during the period:

- Paid Telephone Charges Rs.2000
- Goods Purchased On Credit From M/S.Linga Agencies Was Rs.100000
- Bank Loan Received Rs.200000
- Cash Withdraw from Bank Rs.100000
- Paid Salary by Cheque Rs.10000
- Provision for Depreciation Rs.15000 Allocate In To P&L A/C

- Bank O/D Settled Rs.20000
- Goods Sold to M/S.Jana Was Rs.180000 Bill No:25 25days
- Paid for Rent: 20000, Stationery: 4000, Wages: 6000
- Dividend Received Rs.20000
- Paid Fright Charges Rs.3750 By Cheque
- Purchased Furniture Rs.60000
- Paid to M/S.Linga Agencies and Discount Received @ 5%
- Paid for Salary: 10000, Rent: 30000, Stationery: 1750
- Paid Advertisement Charges Rs.2500
- Interest on Bank Balance Rs.10000
- Depreciation of Machinery @ 10% This Amount Adjusted To Provisions
- Bank Loan Settled Rs.50000
- Bad Debit Written of M/R.Jana Was Rs.5000
- Discount Allowed Rs.3000

2. Create a budget for the fiscal year 2024-2025 in Tally Prime for a manufacturing company named "NPP Manufacturing Ltd."

The company's budget includes the following parameters:

- Sales budget: ₹10,00,000
- Production budget: ₹8,00,000
- Marketing budget: ₹2,00,000
- Administrative budget: ₹1,50,000

Allocate the budgeted amounts to appropriate ledger heads or cost centers within Tally Prime.

Ensure that the budget is flexible enough to accommodate changes in the future, such as revisions to sales targets or adjustments to expense allocations.

Provide a step-by-step explanation of the process of creating this budget within Tally Prime, including any necessary configurations or settings adjustments.

Entry of depreciation in tally

1. Record the depreciation entry for a vehicle purchased for ₹200,000 with a residual value of ₹20,000 and a useful life of 5 years using the Written Down Value (WDV) method in Tally Prime. The vehicle has been in use for 3 years. Provide detailed instructions on how to enter this depreciation entry in Tally Prime, specifying the ledger accounts to use and calculating the depreciation amount.?

2. Jain Bros acquired a machine on 1st July 2010 at a cost of Rs. 14,000 and spent Rs. 1,000 on its installation. The firm writes off depreciation at 10% p.a Every year. The books are closed on 31st December every year. Make necessary depreciation entry in tally?

PART 2 - Advanced Spreadsheet (40Hrs)

1. Create a new workbook using a template and customize its structure. Familiarize yourself with different workbook views and explain their use. Arrange multiple windows within a workbook for multitasking.
2. Open an existing workbook. Enter text and numbers in cells, exploring various formatting options. Select cells, rows, and columns efficiently for data manipulation. Save a workbook in different formats and discuss the implications of each. Locate and open an existing workbook from different locations. Apply various cell manipulations techniques.
3. Open an existing workbook. Apply various formatting techniques. Work with different data management techniques.

4. Create a new workbook. Use Auto Sum for complex calculations. Implement various functions for diverse data analysis and create a formula for custom calculations. Use basic functions strategically in complex scenarios.
5. On an existing workbook, configure page setup options for optimal printing. Set print area and print titles for professional documents. Explore print preview and customize print options. Print specific worksheets and the entire workbook with custom configurations.
6. Apply conditional formatting to highlight specific cells based on conditions. Remove duplicate entries from a dataset.
7. Open a new workbook. Try to do the followings applications in it.
 - a) Create a list of student names and their corresponding grades using data validation to ensure accuracy. Use the IF function to determine whether a student passes or fails based on their grades. Implement nested IF functions to categorize students into different achievement levels.
 - b) Calculate the average grade for the class using the AVERAGE function. Count the number of students who passed using the COUNT and COUNTIF functions.
 - c) Calculate the age of each student based on their birthdates using date functions. Extract the initials of each student's name using text functions. Round the average age of the students to the nearest whole number using the MROUND function.
 - d) Extract a list of students who scored above a certain grade using Advanced Filter techniques.
 - e) Use VLOOKUP to find the contact information of a student based on their ID. Apply HLOOKUP to retrieve the subject marks of a specific student.
 - f) Apply conditional formatting to highlight students who scored below a certain grade. Remove duplicate entries in the list of student names.
 - g) Create a Pivot Table to analyze the distribution of grades across different subjects.
 - h) Create a bar chart to visualize the distribution of grades in the class. Manipulate the chart to emphasize specific data points.
 - i) Link the grades data in one worksheet to another worksheet for cumulative analysis.
 - j) Export the Excel data to Google Sheets and perform basic operations.
 - k) Use Excel's AI tools to generate insights or predictions based on the student grades data.
