

COURSE NAME – DIPLOMA IN FOREIGN ACCOUNTING

Course Code	: DFA
Duration	: 6 months course
Eligibility	: Plus Two
Papers included:	
Theory paper 1	: PC Software
Theory paper 2	: Introduction to Financial Accounting
Theory paper 3	: Introduction to Indian & Foreign Accounting
Theory paper 4	: Advanced Implementation of Foreign Accounting Packages
Lab 1	: PC Software
Lab 2	: Foreign Accounting Packages
Course Fee	: Rs.12,000/-+ GST

Detailed Syllabus:

PAPER I - PC SOFTWARE (50 Hrs)

Module - I (10 Hrs)

Introduction

Generation of computers, types of computers, micro, mini, main frame & super computers, applications, functional units & operation concepts.

Memory Structure

Basic concepts, types of memories from semiconductor RAMs, Memory system Considerations, ROMs, concepts of cache and virtual memory.

Processor Unit

Basic concepts, sequence of operations to execute a complete instruction, hardware control and micro programmed control-brief introduction.

Secondary Storage

Magnetic disk systems-floppy and hard disk -concept of disk operations-characteristics of different types of disk systems-magnetic tape systems-concept of optical storage devices.

I/O Devices

Various I/O devices-concept of video terminals-video displays-alphanumeric displays-graphic displays.

Printers & Plotters – – Types-Specifications-Characteristics.

Module - II (10Hrs)

OperatingSystem

DOS-Introduction, Different Operating Systems, Loading and Quitting the Operating Systems, Important DOS Commands (Internal and External), File and Directory System Concepts in DOS.

WINDOWS

Windows introduction

Operating System

Desktop icons

My Computer, Recycle Bin, Internet Explorer, Network Neighborhood, My Documents.

Working with windows

How to create a Folder, Copying and cutting files, Renaming.

Start icon-Programs, Favorites, Documents, Settings, Find, Run, Shut down, application icons

Module - III (10Hrs)

Documentation using MSWord & Open Office Writer

An introduction to word

The Word workspace, Starting and quitting Word, Creating and Manipulating Various documents, Editing of proofing files, Merging documents and macros.

How to use mouse and menu

Working with dialog box.

Primary commands in file menu

The open command, The New command, The Save As and Save all commands, The Close command, The Page Setup, The Print Exit command.

Edit menu commands

The Cut, Copy and Paste commands, The Undo and Repeat commands.

Format commands

Font commands, Paragraph command.

Other menu

The View menu, The Inset menu, The Tools menu, The Table menu, The Window menu.

Spread Sheet Preparation Using MS Office & Open Office

Building a simple worksheet

Entering Text, Entering Values, Entering Dates and Times, Moving Around, Selecting Ranges, Using Menu, Using Tool Bar, Using Shortcut Menus, Changing entries, Copying entries, Moving Entries, Inserting and Deleting cells.

Formatting Basics

Changing Character Style, Changing Alignment, Changing Column Width.

Working with Multiple worksheet

Copying entries between work books, Moving sheets between work books, Deleting sheets, Quitting Excel.

Opening existing workbooks

Simple calculations. Doing Arithmetic, Totaling column of values, Naming cells and Ranges.

Formatting Text

Displaying dollars and cents, Formatting decimal places, Formatting dates, Copying style and formats.

Formulas that make decisions – Using the IF function, Using the nested IF function, Copying formulas.

Checking Spelling, Printing Worksheets, Preview Worksheets, Setting up the pages.

Sorting data, Keeping Leading in View, Finding records, Adding and deleting Records, Filtering Records.

Plotting charts, Sizing and moving charts, Updating charts, Changing the chart type, Using chart auto format.

Creating Macros, Recording Macros, Running Macros.

Module - IV (10Hrs)

Database Concepts Using MS Access

Introduction to Database – Database System Concepts, DBMS and RDBMS

Planning and designing a database

Creating a database – Sorting Data in Tables, Fields, Records, Two ways to Create a Database, Creating a Database with Database Wizard

Building and Modifying Tables

Create Tables by using the Table Wizard, Create Tables from Scratch, Field Names

Data Types and Field Properties, Modify Tables Using Design View, Entering Data in a Data sheet, Editing Data in a Datasheet, Changing the Width of Columns and Height of Rows, Changing the Order of Columns, Setting of Primary Key

Defining Relationship – Establish Relationship, Enforce Referential Integrity

Querying a Database – – Constructing a Query, Creating the Query, Choose the Tables to Query, Field to Query, Entering the Query criteria, Saving the Results of a Query

Different Kinds of Queries – Crosstab, Update, Delete, Append, Make Table

Building and Modifying Forms – For Entering and Viewing Data, Creating a Form (Design View of Form Wizard), Use the Control Toolbox to Add Controls, Modify Format Properties (Font Style, Size, Color, Caption, etc.) of Controls, Use of Form Sections (Header, Footers and Detail), Use of Calculated Control on a Form.

Module - V (10Hrs)

Slide Presentation Using MS Office & Open Office

Power Point-Main Features of Power Point-Making the Presentation-Creating Template with the Auto Content Wizard. Creating a Presentation with a Template. Creating a presentation from Scratch-

Different Views-Normal Slide, Outline, Slide Sorter, Slide Show, Notes, Slide Master

Animation ,ART and Sound

Controlling Transitions between slides. Animating Different Parts of a slide. Inserting a Motion Clip. Including Sounds in slides.

Including Graphs, Charts, Tables and Columns

Organization Chart Slide, Creating a table Slide. Creating two column Slide, Module 1: Showing A Presentation, Rehearsing/ Timing a Presentation, Designating some slides as “Hidden”, Viewing Slides Anywhere in a Slide Show.

Techniques for Making a Show Livelier

Office Connections

Presenting with the help of other Office Programs Importing the text from a Word Document. – Printing a Presentation.

PAPER II – INTRODUCTION TO FINANCIAL ACCOUNTING (50 Hrs)

Module – I (10 Hrs)

Introduction to Accounting – What is Accounting – – Financial Accounting

Books of Accounts – Cash – Journal – General Ledger

Classification of Accounts and Rules of Debits and Credit – Financial Statement – Trial Balance – Final Accounts Statements – O / S Bills Tracking

Module – II (10Hrs)

Inventory Management – Inventory Analysis – – Depreciation – – Delivering In & Out – Purchase & Sales Invoice – Debit & Credit Notes

Foundation of Accounts – Ledger Accounts and Groups – Account Groups – Liability Side – Assets Side – Income Side – Expense Side

Module – III (10Hrs)

Capital Account – Capital – Reserves & Surplus (Retained Earnings)

Loans (Liabilities) – Bank overdraft – Secured Loans & Unsecured Loans

Current Liabilities – Duties & Taxes – Provisions – Sundry Creditors – Current Liabilities

Module – IV (10Hrs)

Fixed Assets – Investments

Current Assets – Stock in Hand – Deposits (Assets) – Loans & Advances (Assets) –

Sundry Debtors – Cash in hand – Bank Account

Miscellaneous Expense & Suspense Account – Sales & Purchases – Direct & Indirect Income – Direct & Indirect Expenses

Goods and Services Tax (GST) - Introduction - GST Journals

Module – V (10Hrs)

Inventories – Introduction

Types of inventory – – Inventory in case of manufacturing – Raw materials – Work-in-progress – Finished goods / stock – Inventory incase of trading concern – Finished goods / stock

Basis of inventory valuation – – Cost – Net realizable value

Techniques of Inventory valuation – Historical cost methods – FIFO – LIFO –

Average Price – Weighted average price – Non-Historical cost methods

Inventory Record system – Periodic Inventory system – Perpetual inventory system

PAPER III - Introduction to Indian & Foreign Accounting (50 Hrs)

- 1. Introduction To Accounting Packages**
- 2. Features of Accounting Packages**
- 3. Accounting Applications using Electronic Spreadsheet**

4. TALLY ERP 9

Lesson - 1

Maintaining Chart of Accounts In Tally ERP 9

Introduction, Company Creation, Company features and configuration, Chart of accounts, Ledger Creation/alteration and deletion and Group creation/alteration and deletion.

Lesson - 2

Inventory Management

Inventory management, Inventory valuation methods, Inventory master creation- Stock Items, Stock Group, Unit of measures, Godown, Entering Stock opening Balances.

Lesson - 3

Business Transactions

Recording of business transactions with the help of;

Accounting vouchers - Receipt, Payments, Contra, Purchase, Sales, Debit note, Credit note and Journal.

Inventory Vouchers -Receipt note, Delivery note, Rejection in, Rejection out, Stock journal and Physical verification of stocks

Non Accounting Vouchers - Memorandum, Optional and Reversing Journal

Practice with day to day transactions

5. PEACHTREE

Lesson - 1

Getting Acquainted with Peachtree

The Peachtree Environment, The Peachtree Navigation Centres, Using the Menu Bar, Using the Main Application Toolbar, Learning Common Business Terms.

Lesson- 2

Setting Up a Company and other defaults

Creating a Peachtree Company, Setting Customer Defaults, Setting Vendor Defaults, Setting Inventory Defaults, The Payroll Setup Wizard, Setting Payroll & Employee Defaults, Setting Job Defaults, Making a Backup, Restoring from a Backup File.

Lesson- 3

Using General Ledger

General Ledger Default Settings, Adding Accounts, Deleting Accounts, Adding Beginning Account Balances, Adding General Journal Entries,
Basic General Ledger Reports, Entering Account Budgets, Using the Cash Account Register, Using the General Ledger- Actions

Lesson- 4

Starting Accounts Receivable

Setting up the Accounts Receivable Defaults, Adding Customers, Adding Beginning Balances for customers, Setting statement and invoice defaults, Sales orders and invoicing, The sales orders window, The sales/invoicing windows, The Receipts window, Statements and Finance charges, Selecting Deposits, Changing a Record ID

Lesson- 5

Starting Accounts Payable

Setting up the Accounts Payable Defaults, Adding Vendors, Adding Beginning Balances for Vendors, The purchase orders, Entering a Drop shipment, Purchase orders, Purchase and Receive inventory, Payment

6.QUICKBOOKS

Lesson 1: Setting Up QuickBooks

Set Up Company Information, Customize Invoices, Sales Receipts & Estimates, Set Up Invoices, Sales Receipts & Estimates, Products and Services, Set Up Messages, Statements, Expenses, Advanced Settings, Import Bank Transactions, Import Credit Card Transactions, Multiple Users, set up the Chart of Accounts, the Products and Services List, Customers and Vendors.

Lesson 2: Managing Sales, Bills, Income and expenses

Create estimates, Create and send invoices, Receive payment and Create and send sales receipts, Managing purchase invoice and Cheque printing, Payment and Receipt, all other transactions.

7.DACEASY

Lesson 1: Setting Up OF DacEasy

Installation, adding and removing components, Starting DacEasy, Setting up of security, creating company files Using tool bars, Selector Button, Calculator, Sending emails, Changing report layouts, Selection of date.

Lesson 2: Working with DacEasy

Understanding with business centres, Adding/Removing modules to a company profile, Editing/ modifying user information, Using business centre tools, Back up of Date, Restoration of Data, Managing/viewing work place.

PAPER IV – Advanced Implementation of Foreign Accounting Packages (50 Hrs)

Introduction about ERP environment

ADVANCED USE OF TALLY ERP.9

Lesson-1

Taxations and E-filing

Application of Tax Deducted at Source using Accounting Package

Application of Goods and Service Tax using Accounting Packages

Application of Value Added Tax using Accounting Packages

Lesson-2

Banking Activities

Setting up of banking features, Cheque Management – Cheque Printing, Cheque Register, Bank Reconciliation

Lesson-3

Implementation of Payroll

Lesson-4

Generation of Reports

Trial Balance, Balance Sheet, Profit and Loss Account, Cash flow Statements, Fund Flow statements, Ratio Analysis, Day books, Purchase and sales Registers, Stock summary reports and Ageing analysis reports.

ADVANCED USE OF PEACHTREE

Lesson-1

Adding Inventory

Adding and removing inventory, Opening inventory details, Building and Unbuilding Assemblies, Inventory adjustment entries, Changing Prices

Lesson- 2

Creating Payroll

Adding Employees, Opening balances of employees, Paying group of employees, Paying employee, Creating payroll formulas

Lesson – 3

Reports and others

Reporting

Making Backup

Restoring from a Backup file

ADVANCED USE OF QUIKBOOKS

Lesson 1: Banking Transactions

Manually Enter Banking Transactions, Manage Downloaded Banking Transactions, Record Bank Deposits, Transfer Funds Between Bank Accounts, Handle Bounced Checks from Customers, Process Bank Reconciliation. Business Credit Card Transactions, Enter a Credit Card Refund, Reconcile Business Credit Card Accounts

Lesson 2: Reporting in QuickBooks

Primary aim of book keeping is to generate reports. This lesson contain five key reports such as Profit and Loss report, Balance sheet report, Statement of Cash flows and Accounts Receivable and Accounts Payable aging reports.

ADVANCED USE OF DACEASY

Lesson 1: Working with Business Centres

Accessing additional Resources using additional resource links, Viewing business alerts, viewing payable reminder, Viewing scheduled tasks, working with instant report, Changing and viewing reports.

Lesson 2: Reports and Security

LAB I –PC Software (150 Hrs)

BASIC COMPONENTS OF COMPUTER SYSTEM (5 hrs)

CPU-CU-ALU-INPUT DEVICES-OUTPUT DEVICES-MEMORY-RAM - ROM STORAGE - FLOPY-HARD DISC-CD-DVD-ZIP DRIVE

OPERATING SYSTEM (30 hrs)

Introduction, Structure and functions of Operating systems, Different types of Operating Systems, Loading and Quitting the Operating Systems,

WINDOWS

1. WINDOWS INTRODUCTION

Operating System

2. DESK TOP ICONS

My Computer, Recycle Bin, Internet Explorer, Network Neighborhood, My Documents.

3. WORKING WITH WINDOWS

How to create a Folder, Copying and cutting files, Renaming.

4. START ICON

Programs, Favorites, Documents, Settings, Find, Run, Shut down.

5. APPLICATION ICONS

LINUX

1. Getting Started - Logging in and out

Desktop Familiarization: Icons, Desktop, Panel, Main menu, menu items, Window Management (open, Close, minimize and maximize). Gnome and KDE Running applications , The terminal window, shells, command line format, Help Screens and Manual pages, The X-Window system,

Remote display of windows

2. Linux Basics : Desktop settings, Background Screen saver etc.

3. Utilities: Calculator, Storage Devices – Using Floppy and CDROM, Text Editor, Image Viewer, PDF viewer, getting help

MISCELLANEOUS UTILITIES

1. Notepad, Wordpad, paint
2. How to copy the files to CD
3. How to copy files to pendrive
4. Internet browsing

MICROSOFT OFFICE PACKAGE

DOCUMENTATION USING MS WORD & OPEN OFFICE TEXT (35 Hrs)

1. AN INTRODUCTION TO WORD: The Word workspace, Starting and quitting Word, Creating and Manipulating Various documents, Editing of proofing files, Merging documents and macros.
2. HOW TO USE MOUSE AND MENU: Working with dialog box.
3. PRIMARY COMMANDS IN FILE MENU: The Open Command, The New command, The Save , Save As, and Save all commands, The Close command, The Page Setup, The Print command, The Exit command.
4. EDIT MENU COMMAND: The Cut, Copy, and Paste commands, The Undo and Repeat commands, find and replace command
5. FORMAT COMMANDS: Font commands, Paragraph command, Page Layout, Styles
6. Mail Merge Command: Create data source, Entering data, Merging the letter
7. OTHER MENU: The View menu, The Insert menu, The Tools menu, The Table menu, The Window menu

SPREAD SHEET PREPARATION USING MS EXCEL & OPEN OFFICE (35 Hrs)

1. AN INTRODUCTION TO EXCEL: Application area of spreadsheets, Advantages of Electronic spreadsheets
2. BUILDING A SIMPLE WORKSHEET: Entering Text, Entering Values, Entering Dates and Times, Moving Around, Selecting Ranges, Using Menu, Using Tool Bar, Using Shortcut Menus, Inserting and deleting a worksheet into a workbook, Renaming a worksheet, Grouping and regrouping more than one sheet, Changing entries, Copying entries, Moving Entries, Inserting and Deleting cells, cell range
3. FORMATTING BASICS: Changing Character Style and character size, Changing Alignment, Changing row and Column Width.
4. FORMATTING TEXT AND NUMBERS: Displaying dollars and cents, Formatting decimal places, Formatting dates, Copying style and formats.
5. WORKING WITH MULTIPLE WORKSHEET: Copying entries between work books, Moving sheets between work books, Deleting sheets, Quitting Excel.
6. USING BASIC FUNCTIONS: Simple calculations, Doing Arithmetic, Totaling column of values, Naming cells and Ranges, Auto sum functions, Using arrays in formula, Create Array formula
7. FUNCTIONS IN EXCEL: Statistical functions, Mathematical functions, Text functions, Logical functions, Financial functions
8. CREATING CHARTS: Plotting charts, Sizing and moving charts, Updating charts, Changing the chart type, Using chart auto format.
9. SORT AND FILTER COMMANDS: Sorting data, Keeping Leading in View, Finding records, Adding and deleting Records, Filtering Records
10. USING MACRO: Creating Macros, Recording Macros, Running Macros
11. OTHER MENU: Checking Spelling and grammar (Proofing), Printing Worksheets, Preview Worksheets, Page Layouts

PRESENTATION USING MS POWER POINT & OPEN OFFICE IMPRESS (25 Hrs)

1. INTRODUCTION: Basic components in PowerPoint window, Creating a simple presentation, open an existing one, save and close a presentation
2. TEMPLATES: Creating Template with the Auto Content Wizard. Creating a Presentation with a Template. Creating a presentation from Scratch, Deleting a slide, Copying a Slide, Editing a slide

3. **FORMATTING A TEXT:** Changing font size and style, Changing the characteristics of Bullets, Changing indent, Rearranging slides
4. **VIEWING A PRESENTATION:** Normal Slide, Outline, Slide Sorter, Slide Show, Notes, Slide Master
5. **CUSTION ANIMATION AND SLIDE TRANSITION:** Add and remove transition, Controlling Transitions between slides, Animating Different Parts of a slide, Inserting a Motion Clip.--Including Sounds in slides, insert and delete Clip Arts
6. **Organization Chart Slide, Creating a table Slide. Creating two column Slide, Showing A Presentation, Rehearsing/ Timing a Presentation, Designating some slides as "Hidden", Viewing Slides--Anywhere in a Slide Show.**
7. **Presenting with the help of other Office Programs Importing the text from a Word Document. Printing a Presentation.**

INTERNET & E-MAIL (20 Hrs)

1. **INTERNET:** Basics of Internet -Getting connected-Addresses and Names-web objects-sites-E-mail--setting up E-mail-Creating Mail Messages-Editing Mail Messages-Attaching a file-Sending and Receiving Mail-
2. **SEASRCH ENGINES :** Introduction-Search Engines, Search Tools, Types of web browsers
3. **VIRUS:** Different types of virus, Antivirus softwares.

LAB II –Foreign Accounting Packages (150 hrs)

Principles of Accounting
 Manual Accounting
 Financial Management
 E-Filing
 Business Computers Application
 Tally ERP 9
 Excel (Focusing Financial functions)
 Taxation
 GST
 Foreign Accounting Packages
 Peachtree
 Quikbooks/ DAcEASY
